

EPEC ECG Workshop

11 December 2024

Learning Objectives:

- To recognize ECG changes of Acute Coronary Syndrome, including early harbingers of MI
- Recognized and manage arrhythmias and special circumstances
- Assess Cardiac causes of Syncope and become proficient in recognizing ECG features
- Recognized possible non-cardiac causes of ECG changes
- Manage ECGs that may look similar but may have different diagnoses and management.

Course Director

Naeem Toosy

Target Audience

- Increasing the confidence of early stage EM trainees
- As a revision for more experience EM physicians
- Review of ECGs in the Emergency setting for other specialties like Cardiology, Acute Medicine and Anesthesia
