

## Pain Management in the Emergency Department Workshop

11 December 2024 | 8:30 - 17:00 | JW Marriott Marina Dubai, UAE

### Overview

The Pain Management Workshop on pain and addiction management in the emergency department aims to address the pressing need for effective strategies for managing pain while considering the risks of addiction. This educational session will explore current trends in emergency pain management, with a focus on the efficient and judicious use of analgesics of different classes to balance efficacy with safety. Participants will gain insights into the latest pharmacological advancements and non-pharmacological approaches to pain relief. A significant emphasis will be placed on understanding the unique challenges posed by different therapeutic agents and age groups, from pediatric to geriatric patients, in the context of pain and addiction management. The workshop will provide practical guidance on tailoring pain management strategies to the specific painful syndromes and vulnerabilities of diverse populations of patients.

Through a combination of lectures, case studies, and interactive discussions, attendees will enhance their knowledge and skills in providing optimal analgesia, mitigating the risk of addiction, and addressing the complexities of pain management in the emergency department setting.

**Goal:** To Explore Current Tips, Pitfalls, and Controversies of ED Pain Management.

### Course Director

**Sergey M. Motov, MD,  
FAEM**
